## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13 and 17-19 are drawn to compounds, compositions and methods of using the compounds of formula (I).

Group II, claim(s) 20-31 are, drawn to compounds and compositions of formula (III).

Group III, claim(s) 35-37 are, drawn to various methods of use.

Claims 14-16 and 32-34 drawn to non-statutory subject matter (use claims) will be grouped accordingly upon amending the said claims.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the various compounds of formulae I and III defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds of claim 1 clearly have different special technical features than the sulfonated compounds of claim 20, and neither compound define a contribution over the prior art. The various substituents on the various formulae vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and a restriction of the invention in accordance with the rules of unity of invention is proper. Moreover, the vastness of the claimed subject matter and the complications in understanding the subject matter imposes a burden on the examination of the entire application.

Art Unit: 1624

A telephone call was made to David Halstead on 05/29/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
